

Create engaging online experiences for the public with **enterprise website development.**

ISD Information Technology Services

Internet Development

Internal
Services
Department

FEATURES

Website planning, design and development

Comprehensive services include requirements gathering, domain and IP address registration and creation of website designs and graphics.

Joint development and deployment

Customer departments participate jointly in development and implementation to assist in knowledge transfer and ongoing site maintenance.

Advanced search and features

A rich set of features can be incorporated including e-commerce, event calendars, Google maps, search engine optimization and more.

ISD provides a full range of services for the design, development, testing and maintenance of robust websites for County departments. From the gathering of requirements to creative design, through full testing and deployment, ISD Internet Development staff coordinate every aspect of your site including domain registration, IP address management and site content management.

Experience with deployment of both County applications and websites allows ISD staff to ensure your site meets both departmental and County requirements. ISD Internet Development services include:

- Creation of website designs, graphics and visuals
- Coordination of planning, requirements gathering and content approval
- Oversight of County web standards for colors, fonts and user interface
- Integration with external services such as mapping and e-commerce

ISD INTERNET DEVELOPMENT BENEFITS

INTEGRATION WITH COUNTY APPLICATIONS

ISD's knowledge and expertise in County IT systems allows your website to be seamlessly integrated with other applications in the County infrastructure without additional approvals.

ENHANCED SECURITY FOR YOUR SITES

All ISD-developed websites reside on the County Enterprise Network, providing security and data governance, ensuring that your site – and your information is protected.

RESPONSIVE DESIGN FOR MOBILE

All County websites developed by ISD are built using responsive technology which allows them to be viewed on mobile devices, phones and tablets.

INCORPORATION OF COUNTY & FEDERAL STANDARDS

Each site is built to adhere to County standards for website design, colors, fonts, County seal and user interface requirements as well as federally-mandated accessibility standards.
